

**MODELLI / MODELS :** KM070 / KM080 Series Cooking Chef

**OGGETTO:  
SUBJECT :** Alternative Induction Heater PCB and Fan

Febbraio / February 2014

ENGLISH

There are now two suppliers of the Induction Coil, Induction PCB and Fan for the KM080 Cooking Chef.

There are NO external markings on the machine to identify which parts have been fitted to any particular machine. However when looking inside the base they are readily identifiable.

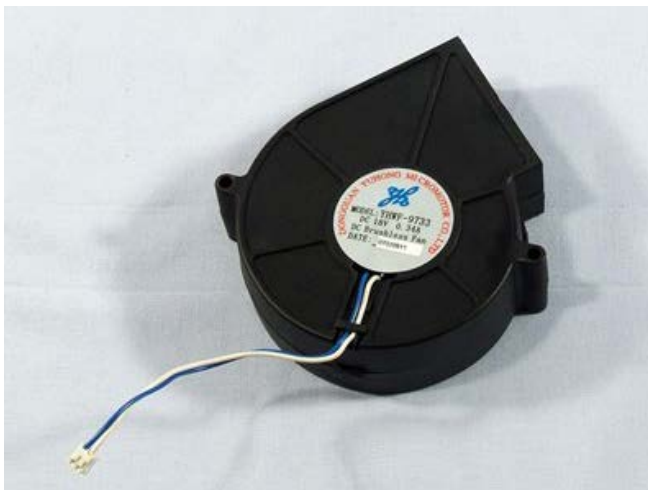

Either set of parts may have been used in production since January 2014. The parts should be replaced on a like for like basis. Each set of parts must NOT be mixed and matched. If necessary all three parts must be replaced as a set if a part of the type fitted is not available.

Version 1 (original)

**KW712918 - FAN MOTOR ASSEMBLY**  
Dongguan Yuhong Micromotor Co Ltd

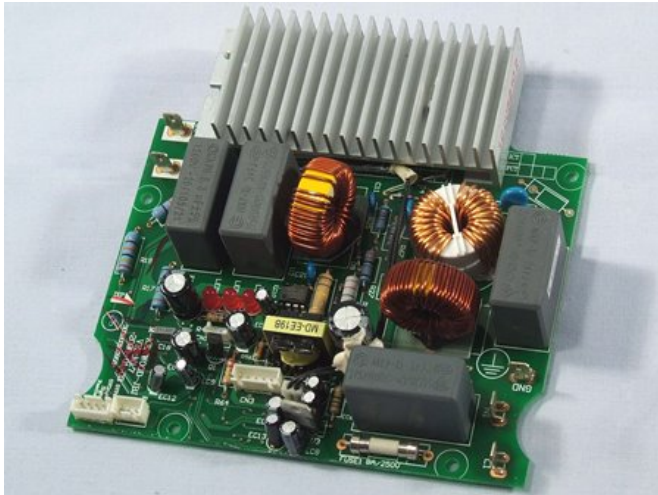

Version 2

**KW715641 - FAN MOTOR ASSEMBLY – v2**  
Runda

**KW712919 - INDUCTION PCB ASSEMBLY**

**Green PCB**

**KW715643 - INDUCTION PCB ASSEMBLY - v2**
